Introduction

This report applies passive footprinting to www.hp.com using only Google search operators such as site:, filetype:, intitle: and inurl:. It records the PDF, PPT and DOC files, login pages, admin pages, contact pages and privacy policies that are publicly visible, without logging in to or probing any system. It then analyses how an attacker could use this information for social engineering attacks such as phishing, vishing and pretexting, and suggests countermeasures.

With hp.com in place of company.com, these are the queries to type into Google:

No.	Category	Google query	Operator used
1	PDF files	site:hp.com filetype:pdf	filetype
2	PPT files	site:hp.com filetype:ppt OR filetype:pptx	filetype, OR
3	DOC files	site:hp.com filetype:doc OR filetype:docx	filetype, OR
4	Login pages	site:hp.com intitle:login	intitle
5	Admin pages	site:hp.com inurl:admin	inurl
6	Contact page	site:hp.com "contact"	exact phrase
7	Privacy policy	site:hp.com "privacy policy"	exact phrase

Findings

Counts are the number of links recorded from the Google results for each search.

RUBRICS

Criteria	Weightage (%)	Level 4 (Exemplary)	Level 3 (ProYicient)	Level 2 (Developing)	Level 1 (Beginning)
Search Technique Application	25%	Correctly applies all assigned search techniques and systematically investigates the assigned organization.	Applies most search techniques correctly with minor errors.	Applies some search techniques but requires guidance.	Unable to apply the required search techniques.
Information IdentiYication and Collection	25%	Accurately identiDies and records relevant documents, login pages, admin pages, contact pages, and privacy-policy information.	IdentiDies most relevant information with minor omissions.	IdentiDies limited information and misses several relevant Dindings.	Fails to identify meaningful information.
Security and Social Engineering Analysis	30%	Excellent analysis of how publicly available information could support social-engineering attacks and demonstrates strong security awareness.	Correctly identiDies most security implications and potential social-engineering risks.	IdentiDies some risks but provides limited technical interpretation.	Fails to recognize signiDicant social-engineering or information-exposure risks.
Documentation and Evidence	20%	Provides complete counts, links, lists, and well-organized evidence with clear technical documentation.	Provides adequate documentation with minor omissions.	Documentation is incomplete or lacks organization.	Documentation is poorly presented, incomplete, or lacks evidence.
